Lovelace

February 9, 2007

Theresa Kelly
Office of Science
Department of Energy

Dear Theresa:

Attached is the corrective action plan for Lovelace Respiratory Research Institute in response to the DOE FIMS Data Audit conducted on February 6, 2007. This action plan contains the necessary steps that LRRI will take to ensure the data in the FIMS database is correct and in the future kept correct and up to date.

As recommended, LRRI will contact Kirtand Air Force Base and Sandia National Laboratory to obtain source documentation for historic designation and possible restrictions.

LRRI will send to you confirmation that the corrective actions have been completed.

Please let me know if there is anything else you need.

Sincerely,

David Griego
Director of Facilities
Lovelace Respiratory Research Institute
